Skills

I already worked on a lot of projects, with the most different technologies to solve the most different kinds of problems, always trying to find who is the best technology to solve each problem. I'm also studying new technologies each week. So this list is in constant changing.

Programming/Markup/Stylesheet/Notation languages
Javascript [ES5, ..., ES Next] (Browser and Node.js), TypeScript, PHP, Dart, CSS3, JSON, XHTML, JSX/TSX

Back-end - Node.js frameworks & libraries
Express, Puppeteer, Socket.IO, TypeORM, Prisma, Sequelize, TypeGraphQL, Nest, AdonisJs, Ts.ED, Next.js, After.js, Gatsby, Pug, EJS, Swagger for Node.js

Back-end - PHP frameworks & libraries
Laravel, Laravel - Inertia, CodeIgniter, Slim Framework, BotMan, Smarty, Twig, Swagger for PHP

API construction & consumption
REST, GraphQL

Query languages
GraphQL, SQL, ReQL, MongoDB Queries

Databases
MySQL, RethinkDB, MariaDB, PostgreSQL, MongoDB, Redis, MSSQL, SQLite

Work/Deployment environment
Docker, Vagrant, Heroku, Digital Ocean, Linode, Generic shared hosts

Test tools
Cypress, Jest, Enzyme, PHPUnit

Dependency managers

Yarn, Npm, Composer

Module bundlers & Task runners

Webpack, Vite, Gulp

Version control

GIT, SVN, CVS

Preprocessors/Static type checkers

Flow, SASS, Compass, LESS

Front-end- Frameworks & Libraries

React, Redux, Zustand, Vue.js, Vuex, jQuery, Axios, Lodash, Bootstrap, Materialize, Material-UI, Handlebars, Glamor, Glamorous, JSS, Styled components, Emotion, Styletron, Stitches

Mobile - Frameworks & Libraries

React Native, Flutter

Linting/Code Quality Tool

Eslint, Standard JS, PHP_CodeSniffer

Prototyping

Figma, Zeplin, Adobe XD, InVision

CMS

WordPress (plugins, themes and widgets)

Others

Babel, Storybook, MVC, ORM, OOP, AWS (S3), Functional programming, SOLID, Natural Language Processing, Scrum, Continuous Integration, Continuous Delivery, Progressive web apps, Reactive programming, Memcached, Responsive design, Web standards, Performance, Usability, Accessibility - a11y, SEO

Experience

I already had the opportunity to work on awesome companies with awesome people.

Front-end Engineer BoostUp

Jan, 2022 - Aug, 2022

Creating new features for BoostUp product (a B2B product focused to provide accurate forecasts for companies, based on AI). I helped to create advanced and highly customizable dashboards, tables, widgets and charts, with a international teams across different time zones.

CTO Delloop

Feb, 2020 - Currently

Building the Delloop product with TypeScript and GraphQL, and the mobile app with Flutter > Also coordinating the web team.

Clevertech consultant - Software Engineer Clevertech

Aug, 2019 - May, 2020

Working on Clevertech clients, with JavaScript/TypeScript.

Aubay consultant - Front-end Engineer CybSafe

Mar, 2019 - Aug, 2019

I worked on the main project of the company, used by the employees of the companies. It's a gamified application aimed at educating users about security topics in the corporate environment. I was responsible for maintaining and implementing the different parts of the application (quizzes, security checklists, video player, ranking, etc.).

Aubay consultant - Front-end Engineer TripAdvisor

Oct, 2018 - Mar, 2019

Working on internal tools and projects for the hotel's segment, using React, Redux, and correlated technologies, migrating legacy technologies to a new stack, or adding new features on current products.

Aubay consultant - Software Engineer OLX

Sep, 2017 - Sep, 2018

Software Engineer at OLX, working on a product for premium sellers on a vertical platform focused on cars sales in some European countries (Standvirtual in Portugal, Autovit in Romania, and Otomoto on Poland). The challenge here was to maintain legacy software (monolithic architecture, classical MVC with PHP) and at the same time work with new technologies (SPA, SSR, PWA, microservices architecture, etc.), migrating parts of the product from the legacy to the new platform, keeping in mind important items, like SEO.

Tech Lead & Full Stack Developer Planedia

Jun, 2013 - Jul, 2017

I worked on this startup since it was founded, working as a back-end, using Node.js/express/MongoDB, PHP/Laravel/MySQL and sometimes, at the front-end position, working with React & Redux. I also helped with the recruiting process to get new developers and taking technical decisions.

Front-end Engineer Liferay

Mar, 2012 - Feb, 2013

Allocated inside a Liferay customer (Leroy Merlin Brazil), I helped to upgrade the customer website, applying the most recent Liferay features and the Liferay best practices, and to convert it on e-commerce portal, able to sell more than 80.000 different products.

Front-end Engineer Record TV

Jan, 2011 - Mar, 2012

I worked on the blogs team, using WordPress. Involved in dozens of projects, I created blogs and sites for soap operas, reality shows, news programs, journalists, auditorium programs, etc. My mission was creating themes, plugins, and widgets for different projects. Previously, the company has contracted external partners for creating his projects. I started on a new blogs team (I was the third member). At the end of the year, we were more than 20 members. There were no more external partners working on projects because the sites and blogs were created and maintained by our team.

Back-end Developer Grupo Ser Educacional

Oct, 2008 - Feb, 2012

As a back-end developer, I worked on some educational software inside of this company. With more than 100.000 students around the country, the educational group needed software to the handle library books and books reservations, control financial data, students make enrolment, paying his monthly tuition, entrance exams, etc.

Courses

I know, is not a lot and they are unfinished, but I can't learn using the traditional courses (I'm trying, but the applied methodologies not helping). But, this not means I not study. I do this every day, but using my way. I try to learn something new every single day.

Bachelor of Computer Science Faculdade dos Guararapes
Jul, 2006 - Dropout

Mechatronics technician ETEPAM
Jan, 2008 - Dropout

Computer Technician IFMA
Jul, 2006 - Dropout

Electronics Technician IFMA
Jul, 2004 - Dropout

Open Source

Since my career's beginning, I always used open source tools. So, why not to contribute with some open source tools?

Laravel bootstrap forms 4

<https://github.com/netojose/laravel-bootstrap-4-forms>

Laravel 5 package forms for bootstrap 4

Laravel 5 API REST explorer

<https://github.com/netojose/laravel-api-explorer>

API explorer for laravel applications

Google Maps Places Autocomplete React component

<https://github.com/netojose/react-google-places-typeahead>

A React component to build a customized UI for Google Maps Places Autocomplete

React Select date picker

<https://github.com/netojose/react-select-datepicker>

A simple React date picker based on select fields

React Modal

<https://github.com/netojose/react-modal>

A lightweight dialog component for React

My site

<https://github.com/netojose/site>

Source code used for this webSource code for my personal website
